Dear Team,

Please find the summary and action items from today's meeting regarding database performance.

👥 Participants
- Speaker (Unidentified)
- Attendee (Unidentified - addressed as "You")

📋 Overview
The meeting was a brief technical touchpoint focused on addressing system performance issues. The primary objective discussed was the optimization of SQL queries that are currently experiencing slow execution times.

✅ Key Decisions
- The team identified that manual intervention is required to optimize specific database queries to improve overall performance.

📌 Action Items
- Owner: Unassigned (Addressed as "You")
- Task: Review and optimize slow-performing SQL queries.
- Deadline: None specified.

💬 Key Discussion Points
- Performance bottlenecks caused by SQL queries taking too long to execute.
- Allocation of responsibility for investigating the database performance.

🔁 Follow-ups Required
- Confirmation of which specific queries are underperforming.
- Confirmation from the assigned individual regarding their availability to take on this task.
